Application/Control Number: 09/849,966

Art Unit: 1773

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

- 2. Claims 1, 2, 4, 7-9, 11, 14-18 and 20 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Veerasamy et al US 5858477 in view of Veerasamy et al US 5303225 and Takahashi et al JP 10-143836 for the reasons of record.
- 3. Applicant's arguments filed 10 August 2004 have been fully considered but they are not persuasive.

Applicants traverse the rejection and argue that the references do not disclose or suggest the specific combination of controlled hardness and controlled adsorbtion of liquid lubricant wherein the carbon layer is made by nitrogen ion beam.

Applicants argue that Veerasamy '477 does not teach the combination since in Veerasamy '477 the carbon protective layer is formed by an FCA process in the presence of nitrogen gas flow without relying on a nitrogen ion beam.

However, applicants have produced no evidence that their product is patentably distinct from that of Veerasamy '477.

Furthermore applicants have actually taught in their specification that the process used i.e. nitrogen ion beam assisted Filtered Cathodic Arc process is equivalent to using FCA in a nitrogen atmosphere and that applicants repeated the process using FCA in a nitrogen atmosphere (like Veerasamy '477) and obtained "excellent durability and lubricant adhesion comparable to the above results obtained with application of the ion beam assist method". (See page 6 lines 19-20; page 15 lines 22-26; and page 32 lines 12-33 of the present specification).

Application/Control Number: 09/849,966

Art Unit: 1773

Note also that Veersamy '225 specifically teach that the use of Nitrogen dopant may lower the contact angle to less than 10 degrees and that the carbon has an average hardness of at least about 10 Gpa (Col 3 lines 37-40) and more preferably at least about 20 Gpa (Col 5 lines 33-36).

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stevan A. Resan whose telephone number is 571-272-1513. The examiner can normally be reached on Tues-Thurs from 7:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones, can be reached at 571-272-1535. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
